

LENZING™ Lyocell fibers are manufactured at this present time using dissolving pulp derived from wood as stated below and can be manufactured at these production sites:

Lenzing (Austria), Heiligenkreuz (Austria), Grimsby (UK), Mobile (USA), Prachinburi (Thailand)

The production sites in Lenzing Austria (LAG) and Mobile (USA) are PEFC CoC and FSC® CoC certified.

Certified fiber is available from these sites after discussion with the appropriate commercial contact.

LENZING™ Lyocell fiber from Prachinburi, Heiligenkreuz, Grimsby, Mobile and Lenzing Austria (LAG) can be supplied as FSC Mix Credit after discussion with the appropriate commercial contact.

Note: Other new sustainable dissolving wood and pulp types may be tested in the manufacture of LENZING™ Lyocell fibers.

Wood species:

Acer saccharum, Betula alleghaniensis, Betula papyrifera, Betula pendula, Betula populifolia, Betula pubescens, Eucalyptus camaldulensis, Eucalyptus pellita, Eucalyptus urophylla, Eucalyptus urophylla, Eucalyptus dunni, Eucalyptus grandis, Eucalyptus grandis x Eucalyptus camuladensis, Eucalyptus grandis x Eucalyptus nitens, Eucalyptus macarthurii, Eucalyptus nitens, Eucalyptus smithii, Fagus sylvatica, Fraxinus americana, Fraxinus excelsior, Fraxinus nigra, Fraxinus pennsylvanica, Picea abies, Pinus elliotii, Pinus mugo, Pinus nigra, Pinus plauris, Populus balsamifera, Populus deltoides, Populus grandidentata, Populus tremula, Populus tremuloides, Populus trichocarpa x Populus deltoides (TxD hybrid), Prunus pensylvanica, Prunus serotina, Sorbus Americana, Tilia americana, Ulmus americana

Countries of Origin:

Austria, Czech Republic, Estonia, France, Germany, Hungary, Latvia, Poland, Slovakia, Slovenia, South Africa, Swaziland, Sweden, Switzerland, USA

- **EU Timber Regulation 995/2010 (EUTR):** Cellulosic fibers are NOT listed as articles under the EUTR. According to this regulation, operators that place timber and timber products on the market for the first time should be subject to the diligence system. A trader further downstream the supply chain should provide “basic” information.
- Despite the fact that the EU Timber Regulations do not directly apply to Lenzing fibers or the products of our customers, Lenzing fully supports the principles of the Timber Regulations.
- Lenzing AG avoids using timber that has been harvested illegally or in violation of traditional civil rights (see the Lenzing Group’s Wood and Pulp Policy, the Lenzing Global Code of Business Conduct and the Lenzing Group Sustainability Report: <https://www.lenzing.com/download-center/filter1/sustainability/filter2/sustainability-reports/>)
